

RITRANSPARENCY REPORT 2020

Elo Mutual Pension Insurance Company

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

00 11.4

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

Our DD questionnaire includes a section devoted to ESG issues. We ask the fund manager to provide wide range of information on their stance towards ESG issues, ie. do they have a written policy on responsible investing or ESG- issues, is it integrated to their processes, whether they have an engagement policy, are they reporting ESG related risks / opportunities to their investors, do they have a published climate strategy and so on.

We monitor broadly managers' practices regarding ESG. We analyze underlying holdings of each fund, and if we find controversies related to specific companies, we will discuss them with the manager. When possible we monitor also portfolios underlying holdings. Also, we interview fund managers on ESG- practices and integration.

When selecting external managers we assess the manager's overall approach towards RI. We prefer managers that are PRI signatories and have an integrated ESG strategy.

Real world economy targets means manager's approach to climate change issues. We encourage managers to develop and communicate a climate strategy.

Property: As a minimum level, the property portfolio has to have above medium GRESB score against its peer group.

LE: Reporting on controversial weapons and tobacco is required.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

Within the corporate investments ESG issues are integrated into the investment process on a portfolio manager level within the overall company analysis. We also use external screening services. Screening strategy is done to understand the risks in the specific investment and on a portfolio level. We screen for certain elements like CO2 emissions, controversial weapons, tobacco companies, global compact and positive impact. The thematic approach involves for e.g CO2 intensity and positive impact within the credit portfolio. We also exclude companies deriving 25% or more revenue from the mining of thermal coal or from the thermal coal based power generation.

PR 07.3	Provide a brief description of your organisations selection, appointment and monitoring of third party property managers and how they contribute to the management of ESG issues for your property investments.
' '	r manager selection is done through negotiations with potential partners based on our policies, requirements, objectives and legislation guiding ions as a Finnish mutual pension insurance company.

Manager selection is done on the basis of e.g. manager's expertise in certain property class or market area, identifying environmentally friendly and cost-effective solutions in property maintenance and customer service capability.

In addition, we investigate manager's commitments to corporate responsibility and environmental initiatives as well as employee equality programs, employee well-being measurement systems, references etc. and make sure that all manager's operations comply with legislation.

We monitor our third party managers by regular meetings and reporting in accordance with our operating protocols. Decisions and alignments are documented

Energy and electricity consumption

Extension of properties monitored, commitment to national energy efficiency agreement. Monitoring system development and green electricity 2019.

Water consumption

Waste amounts and recycling

Extension of properties monitored, commitment to national energy efficiency agreement. Monitoring system development and green electricity 2019.

Extension of properties monitored, commitment to national energy efficiency agreement. Monitoring system development and green electricity 2019.

Extension of properties monitored, commitment to national energy efficiency agreement. Monitoring system development and green electricity 2019.

Extension of properties monitored, commitment to national energy efficiency agreement. Monitoring system development and green electricity 2019.

✓ Social

Target/KPI	Progress Achieved
Tenant satisfaction	Slightly increased tenant satisfaction. We have updated processes concerning activities linked to customer relationships such as property management, leasing, lease administration

✓ Governance

Target/KPI	Progress Achieved
Potential deficiencies in grey economy prevention (partner selection, tax compliance etc.) Conflict of interest considerations	No major defects or risks identified Issues during the reporting year handled according to operation protocols and transparent decision-making

 $\hfill \Box$ We do not set and/or monitor against targets

PR 09.3 Additional information, [Optional

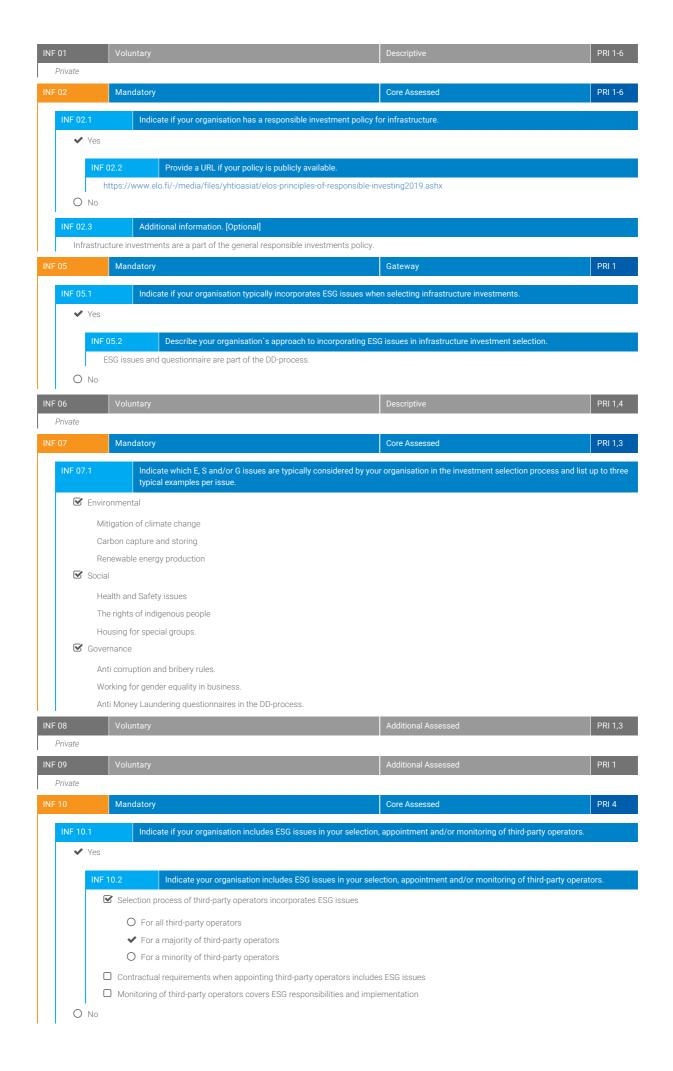

During the reporting year, we conducted calculation of carbon dioxide emissions for the majority of our portfolio in property level. Target for energy consumption reduction in the portfolio was set to -7,5% by year 2025.

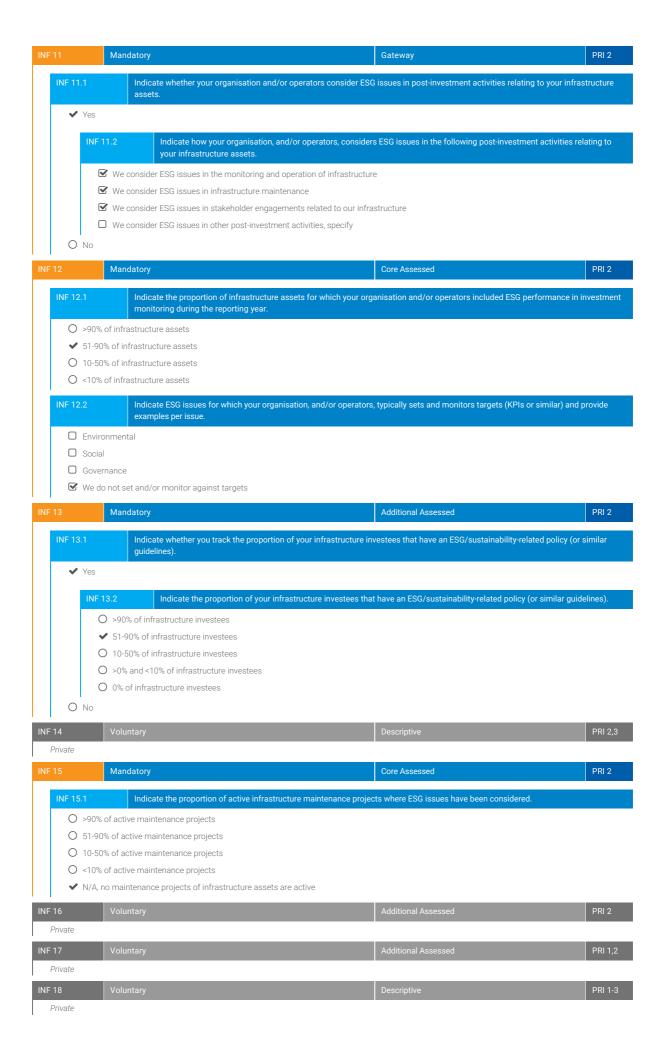

We aim at systematic measurement of incidents and insurance claims in our properties in order to improve prevention of these incidents for taking place.
